ABOUT

Software engineer, 3 years. C#/.NET microservices across fintech, enterprise AI, and critical infrastructure. Kafka event pipelines, Redis caching, FIX/FIXML integrations; delivered across 9 full project lifecycles.

SKILLS

Backend: C# 12+, .NET 8, ASP.NET Core, Entity Framework Core, Python (FastAPI), REST APIs, Microservices, Multi-threading, async/await

Frontend & Integration: JavaScript, HTML/CSS, React, Next.js, web API integration, connector-based workflow development

Messaging & Databases: Kafka (topics, partitions, consumer groups, DLQ), RabbitMQ, Redis (Redisson), MySQL, MSSQL, MongoDB, CosmosDB

DevOps & Cloud: Docker, AWS, Azure, OpenStack, Git, CI/CD, Linux, RBAC, JWT, secure coding practices

AI & Engineering: AI-assisted development (Claude Code, Codex), GenAI platform development, unit & integration testing, code review

PROFESSIONAL EXPERIENCE

TechCompiler Data Systems Pvt Ltd | *Software Engineer*

May 2024 – Present | Noida

Service-based; 7 client engagements spanning AI platforms, fintech, and critical infrastructure.

DRaaS Platform: Multi-Cloud Disaster Recovery

- Built a multi-cloud DRaaS POC: AWS/Azure VM discovery, baseline replication into OpenStack Cinder volumes, incremental changed-block snapshots, and health-triggered automated failover
- Implemented sparse VM disk transfers using 16 concurrent Azure range requests and EBS Direct APIs, streaming raw disks into OpenStack Glance without local storage
- Hardened the platform with Argon2id hashing, JWT auth, AES-256-GCM credential encryption, per-user isolation, Pydantic input validation, and sanitised CORS

Emerge AI: Enterprise AI Chat Platform

- Mentored 2 junior developers and 1 intern; led code reviews, backend architecture decisions, and engineering best-practice adoption across the Emerge AI team
- Engineered connector framework linking AI agents to Google Drive, M365, and enterprise tools; scope-based auth, permission-aware retrieval across 3 cloud providers
- Shipped agentic workflow pipelines automating 4+ recurring operations; resolved 15+ OAuth, Drive API quota, and cloud workspace access edge cases in production

Trade Automation Portal

- Architected 6-module trade lifecycle backend from scratch: creation, allocation, CME/ICE submission via FIX/FIXML, audit, email notifications, reporting
- Redesigned synchronous flow into Kafka event pipeline: trade.created → allocation.completed → exchange.submission.requested → audit, notification
- Secured 10+ REST endpoints with JWT + RBAC; configured Redis cache-aside with Redisson distributed lock preventing thundering herd; 99.95% uptime

PropVivo | *Fullstack Developer*

Mar 2023 – Mar 2024 | Surat

Product startup; backend owner promoted to CRM Lead; 2 SaaS platforms: CRM, accounting, notifications.

PropVivo CRM, Accounting & Notification Engine

- Scaled async notification engine to 300K+ messages/month at 99.7% delivery; built 3-tier retry with configurable backoff and DLQ-backed dead-letter routing
- Slashed CRM and reporting API latency 40% via query restructuring and composite indexes; automated 1,500+ monthly transactions, cutting manual effort by 60%
- Sustained 99.95% uptime across 2 platforms serving 80+ organisations and 2,400 active users; distributed transaction management across 3 service boundaries
- Promoted to Backend CRM Lead; led sprint planning, code reviews, and mentorship for the CRM module; coordinated 3 major platform releases across teams

EDUCATION & RECOGNITION

Vellore Institute of Technology, Bhopal | *B.Tech, Computer Science Engineering*

2019 – 2023

Rising Star of the Year, PropVivo (2023) • 30 Days of Google Cloud Winner (2020)
